Lukáš Kovář

Backend & Infrastructure Engineer

Královéhradecký, Česko

Souhrn

My journey into programming and web development began when I was 15, and my passion has only grown since then, we started project Lout'áci with my friend making websites/webapps which we support to this date. I've been involved in creating our innovative lighting control system, now I am still managing few sites and working on extending features payment gateway Comgate to make it SCALE, handle super high traffic with zero downtime. You maybe see no AI in my motto, that's not because I don't use it (I can burn over 1000 usd/mo of tokens for work + passion projects), I just try to balance between AI slop and doing the real engineering.

Pracovní zkušenosti

Comgate

Software Developer

července 2024 - Present (2 roky 2 měsíce)

Hradec Králové, Czechia

Lout'áci

Web Developer

prosinec 2019 - Present (6 let 9 měsíců)

Contract development of custom apps and websites.

Build registration portals, websites, eshops, custom CRM with my friend.

Spectoda

Head of Software

ledna 2021 - června 2024 (3 roky 6 měsíců)
